DETAILED ACTION

Claim Objections

1. Claim 6 is objected to because of the following informalities:

Claim 6 recites the limitation "said iron alloy" in line 2. There appears to be insufficient antecedent basis for this limitation in the claim. Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Miller (US 3,867,748).

Miller teaches a cylinder 38 comprising a body made of an iron alloy (col. 4, lines 34-37) having about 36% nickel by weight and having a linear coefficient of expansion of about $\alpha < 1.5 \times 10^{-6} \text{ K}^{-1}$ in a temperature range of from 20° to about 60°, where the entire cylinder is made of the iron alloy, and two journals 19,20 where the body is a barrel and only the barrel is made of the metallic material.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US Patent 3,791,037 to DiCiaccio et al. and 6,082,202 to Hussain disclose similar devices.
